This software is a set of decently designed icons in various shapes and colors that you can use to spice up your movie files and folders. It will automatically replace regular icons used to represent them by the same images (for instance, a folder icon might start out as an envelope, but will be automatically changed to a folder). But if you want to do it manually, it is very easy: just drag & drop your images of choice on the icons collection. Icon sizes: 32x32, 64x64, 128x128 I created some of the icons in this set. (See included screenshots for reference). They are mostly part of the Matrix icon collection but you can also see other sets. I tried to keep them consistent with previous icon sets and to keep them as simple as possible. I wanted it to be, as the name suggests, a Matrix Pack! The download is free but the license for commercial use is required (see below). License: The Matrix Pack is a Photoshop Resource for Adobe Photoshop. You can use the images in your projects, on websites, blog posts, or anything else you like. Simply purchase the license you need from the hyperlinked page below. Feel free to give me credit as well (see below). Credits: Iconset base is a code I made to help me optimize images used as icons. I also included other lovely artwork I found in the web. If you wish to contribute to the iconset, you're always welcome to. Useful links: 2. Bugs: 1. (You can also see a preview and a screenshot of the icons here: 2. Icons have a very obvious white line in the middle. It looks a bit off and it seems to be a known issue. I can't find any solution, but it can be fixed in Photoshop. The description in.ico files says it's there because of pixel mapping, and it looks like the PNG files do not have this line as well, but I'm not sure. 3. Icons have a B/W option, and Iconset doesn't seem to have any option to change the colors. Screenshot Preview Resources Create your free two-week trial account at Designzzz.net.
